

# Worksheet

2/14/19

Name: \_\_\_\_\_ Grade: \_\_\_\_\_

1)

Measure the size of the angle.

Quick:  
4788

a)

26 deg.

b)

87 deg.

2)

Draw an angle of the specified size.

Quick:  
7461

a) 63 degrees

b) 48 degrees

3)

What type of angle is shown? Mark the correct answer!

Quick:  
6921

a)

- reflex angle
- obtuse angle
- full angle

4)

Quick:  
2915

Calculate the area T of this triangle. Do this by drawing one of the heights at your choice and measure its length along with the length of the corresponding side.

a) Area:

$$a \cdot h_a / 2 = 8.4 \cdot 4.9 / 2 = 20.6$$

$$b \cdot h_b / 2 = 6 \cdot 6.9 / 2 = 20.7$$

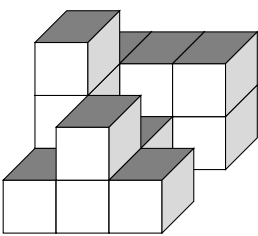

$$c \cdot h_c / 2 = 7 \cdot 5.9 / 2 = 20.7$$

5)

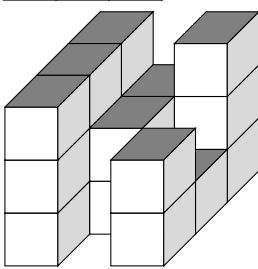

Quick:  
6867

How many cubes have to be added to this building to make it a solid cuboid?

a) 

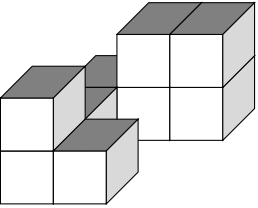

1	1	1
0	2	3
2	1	2

  
=13

b) 

0	1	0
0	1	2
0	3	1

  
=8

c) 

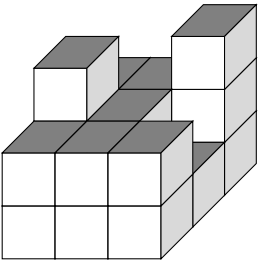

1	0	0
1	2	2
0	1	2

=9

6)

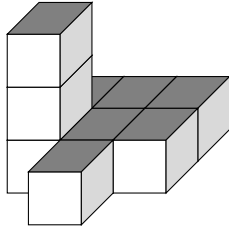

How many cubes is this building made of?

Quick:  
3555

a) 

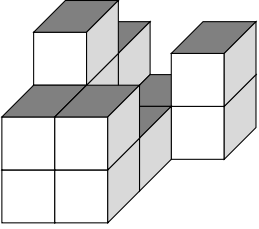

2	2	3
3	2	1
2	2	2

=19

b) 

1	1	1
3	1	1
0	1	0

=9

c) 

2	1	2
3	1	0
2	2	0

=13

Good Luck!
