Problem quickname: 8324

1)

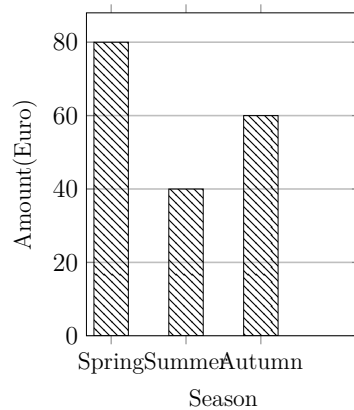

Create a vertical bar chart, a column chart, for this table of values. Label the X axis with "Direction", the Y axis with "Amount".

Direction	Amount(Cent)
North	50
East	60
South	70
West	100

2)

Complete the vertical bar chart.

Season	Amount(Euro)
Spring	80
Summer	40
Autumn	60
Winter	20

3)

Complete the vertical bar chart. Label the X axis with "City", the Y axis with

"Weight".

City	Weight(g)
Stanchfield	700
Tippecanoe	900
Griffin	600
Annabella	300
Salesville	800
Welsh	1000

4)

Complete the vertical bar chart. Label the X axis with "Season", the Y axis with "Volume".

Season	Volume(cm ³)
Spring	400
Summer	900
Autumn	100
Winter	800

Good Luck!
