Problem quickname: 2501

1)

What whole number has the fraction been multiplied with? Fill in the blank.

- a) $\square \cdot \frac{7}{17} = \frac{14}{17}$ b) $\square \cdot \frac{7}{20} = \frac{7}{10}$ c) $\square \cdot \frac{1}{5} = \frac{4}{5}$ d) $\square \cdot \frac{5}{18} = \frac{5}{6}$
e) $\square \cdot \frac{2}{19} = \frac{8}{19}$ f) $\square \cdot \frac{1}{7} = \frac{2}{7}$ g) $\square \cdot \frac{2}{19} = \frac{8}{19}$ h) $\square \cdot \frac{9}{19} = \frac{18}{19}$
i) $\square \cdot \frac{7}{17} = \frac{14}{17}$ j) $\square \cdot \frac{5}{16} = \frac{15}{16}$

2)

What whole number has the fraction been multiplied with? Fill in the blank.

- a) $\square \cdot \frac{3}{10} = \frac{3}{5}$ b) $\square \cdot \frac{6}{17} = \frac{12}{17}$ c) $\square \cdot \frac{3}{19} = \frac{9}{19}$ d) $\square \cdot \frac{1}{20} = \frac{3}{4}$
e) $\square \cdot \frac{5}{17} = \frac{10}{17}$ f) $\square \cdot \frac{3}{16} = \frac{15}{16}$ g) $\square \cdot \frac{1}{3} = \frac{2}{3}$ h) $\square \cdot \frac{5}{16} = \frac{15}{16}$
i) $\square \cdot \frac{5}{16} = \frac{5}{8}$ j) $\square \cdot \frac{4}{15} = \frac{8}{15}$

3)

What whole number has the fraction been multiplied with? Fill in the blank.

- a) $\square \cdot \frac{1}{4} = \frac{3}{4}$ b) $\square \cdot \frac{1}{9} = \frac{2}{3}$ c) $\square \cdot \frac{2}{5} = \frac{4}{5}$ d) $\square \cdot \frac{1}{5} = \frac{2}{5}$
e) $\square \cdot \frac{1}{4} = \frac{3}{4}$ f) $\square \cdot \frac{4}{9} = \frac{8}{9}$ g) $\square \cdot \frac{1}{8} = \frac{3}{4}$ h) $\square \cdot \frac{3}{10} = \frac{3}{5}$
i) $\square \cdot \frac{2}{9} = \frac{2}{3}$ j) $\square \cdot \frac{3}{10} = \frac{9}{10}$

4)

What whole number has the fraction been multiplied with? Fill in the blank.

- a) $\square \cdot \frac{5}{6} = 13\frac{1}{3}$ b) $\square \cdot \frac{10}{29} = 3\frac{3}{29}$ c) $\square \cdot \frac{2}{27} = \frac{2}{3}$
d) $\square \cdot \frac{16}{7} = 61\frac{5}{7}$ e) $\square \cdot \frac{23}{8} = 34\frac{1}{2}$ f) $\square \cdot \frac{4}{11} = \frac{8}{11}$
g) $\square \cdot \frac{14}{3} = 74\frac{2}{3}$ h) $\square \cdot \frac{2}{3} = 18$ i) $\square \cdot \frac{17}{20} = 15\frac{3}{10}$ j) $\square \cdot \frac{5}{3} = 10$

Good Luck!
