Problem quickname: 3090

1)

Specify the line equation for the line shown.

Quick:
3090

a)

Line equation: $y = -\frac{1}{2}x$ or, with fraction in decimals: $y = -0.5x$

b)

Line equation: $y = -\frac{1}{4}x + 5$
 or, with fraction in decimals: $y = -0.25x + 5$

2)

Specify the line equation for the line shown.

Quick:
3090

a)

Line equation: $y = -x - 1$

3)

Specify the line equation for the line shown.

Line equation: $y = -\frac{3}{4}x + 9$
 or, with fraction in decimals: $y = -0.75x + 9$

Line equation: $y = x + 2$

4)

Specify the line equation for the line shown.

a)

Line equation: $y = -x$

b)

Line equation: $y = -\frac{1}{4}x - 3$ or, with fraction in decimals: $y = -0.25x - 3$

Good Luck!
