Problem quickname: 3090

1)

Specify the line equation for the line shown.

Quick:
3090

a)

Line equation: $y = x + 1$

b)

Line equation: $y = x$

2)

Specify the line equation for the line shown.

Quick:
3090

a)

Line equation: $y = 2$

b)

Line equation: $y = -x$

3)

Specify the line equation for the line shown.

Quick:
3090

a)

Line equation: $y = -\frac{1}{2}x - 1$
or, with fraction in decimals: $y = -0.5x - 1$

4)

Specify the line equation for the line shown.

Line equation: $y = \frac{1}{2}x + 4$ or, with fraction in decimals: $y = 0.5x + 4$ Line equation: $y = \frac{2}{5}x + 10$ or, with fraction in decimals: $y = 0.4x + 10$

Good Luck!
